Fact Find Sheet - Solar (Roof and Ground)

Key Questions

- Rationale for the procurement of the Solar Panels
- What equipment and pre-delivered services are being funded (itemised with serials and costs) (e.g. Goods/ fittings/ installation/ delivery/ method statements/ surveys/ risk assessments/ completion certificates/ collection and disposal of existing fittings/ commissioning)? Who are the manufacturers of the goods?
- Who is the Supplier?
- Who is the Installer?
- Planning permission required by Local Authority?
- Planning permission granted by Local Authority?
- Any groundwork's required? Have they been completed? Are they required to be funded?
- Is warranty being provided on the goods, if any? Who is underwriting the warranty?
- Is warranty being provided on the installation, if any? Who is underwriting the warranty?
- Has an energy audit been completed? If so, please provide a copy?
- Economic analysis showing the savings generated and pay back.
- What data, if any, does the supplier / installer provide to the customer to monitor performance and whether projected savings have been met? And what happens if the saving claims fall short?
- Is the supplier / installer guaranteeing performance savings?
- What is the installation address of the goods?
- Does the customer own the building(s) where assets installed?
- Who does own the building(s) where assets are installed? Full address and Land Title No. of installation?
- Are there any ongoing services being provided by the supplier, installer, or manufacture?
- Confirm all ongoing services are separate and outside of the lease?
- Is there an option / tool to limit or restrict functionality of the goods should the customer default under finance agreement?
- Has the customer signed order confirmation?
- When is the installation due to be installed and go live?

Benefits of Solar Panels for your Business

- Significantly reduce business overheads

  Generate and store free, clean energy on-site and improve your bottom line with up to 100% savings on your electricity bills.

- Secure your future energy.

  Pre-purchase electricity at a fixed unit price, forecast your long-term energy costs and protect your business against future increases in utility prices.

- Save money whilst protecting our planet.

  Utilise clean, renewable energy to offset your corporate carbon footprint, lower your energy demand from fossil fuels and reduce your pollution.

- Protect your business from power shortages.

  Generate and store your own energy, reduce reliance on the National Grid and protect your business from potential rationing and brownouts.

- Achieve a healthy ROI (Return on Investment)

  A typical commercial solar panel system will provide free electricity for more than 25 years, achieve returns of more than 12% per annum and pay back installation costs within 6-8 years.

- Create a competitive advantage.

  Visibly promote your green initiatives, improve corporate reputation, and strengthen relationships with supply chains and customers.
